PROFESSIONAL SUMMARY

MIS Executive with hands-on experience in Advanced Excel, MIS reporting, SQL/MySQL, and data analysis. Skilled at preparing daily, weekly, and monthly business reports, validating large datasets, and building dashboards that support operational decision-making. Also builds end-to-end analytics projects using Python, PostgreSQL, and Power BI. Quick learner with strong analytical skills and attention to detail.

SKILLS

Reporting & Analysis: Advanced Excel, Pivot Tables, VLOOKUP, XLOOKUP, MIS Reporting, Dashboard Preparation, Data Validation, Data Analysis

Data & Databases: SQL, MySQL, PostgreSQL, Database Management, Python (Pandas), Power BI, Google Sheets

Tools: Microsoft Office, Google Sheets, VS Code, Git/GitHub

WORK EXPERIENCE

MIS Executive — AbyBaby Private Limited

Mar 2026 – May 2026

- Prepared daily, weekly, and monthly MIS reports for management review, tracking key operational metrics.
- Managed and validated business data across Excel and Google Sheets, ensuring accuracy for reporting.
- Built Pivot Table and lookup-based (VLOOKUP/XLOOKUP) reports to track operational performance.
- Performed data cleaning, reconciliation, and quality checks to maintain data integrity.
- Assisted in database maintenance and basic MySQL/SQL reporting.
- Coordinated with cross-functional teams to consolidate and analyze business data.

Field/Documentation Intern — National Innovation Foundation (NIF) – India

Jan 2020 – Mar 2020

KIT Campus Center · Autonomous body, Dept. of Science & Technology, Govt. of India

- Documented grassroots technological innovations and traditional knowledge practices collected from rural innovators.
- Pushed and updated verified innovation records into NIF's national innovation database, maintaining accuracy and completeness.
- Supported field-level documentation efforts as part of NIF's mission to scout and preserve grassroots innovation.

PROJECTS

E-Commerce Customer Analytics

Personal Project

Python · PostgreSQL · Power BI

- Analyzed a synthetic dataset of 5,000 Indian e-commerce customers end-to-end, from raw data to business-ready insights.
- Performed data cleaning and exploratory data analysis (EDA) in Python (Pandas) to profile customer behavior.
- Wrote business-focused SQL queries in PostgreSQL covering spending, acquisition, and retention patterns.
- Designed an interactive Power BI dashboard tracking spending, acquisition, engagement, conversion, retention, returns, and churn.
